Experience

**Making Science Visible Project Researcher**
University of North Carolina at Chapel Hill
June 2019 – Present • 1 month

**Research Assistant**
UNC Graphics & Virtual Reality Group
March 2018 – Present • 1 year 4 months

**UNC Webmasters Member**
University of North Carolina at Chapel Hill
February 2019 – Present • 5 months

UNC Webmasters is a community that brings together faculty, staff, and students to share, learn, discuss, and advocate for great experiences on the web and related technologies.

Our objectives include:

- Sharing knowledge, ideas, and resources.
- Providing a forum for training, discussion, collaboration, and connecting people.
- Advocating for web standards, accessibility, and best practices.
- Fostering a friendly, open atmosphere that encourages participation and growth.

We are trying to develop applications that are not only functional and efficient, but are also scalable.

Creating value for the University by leveraging existing technologies, harnessing our own talent, and increasing efficiencies.

**UNC Department of Computer Science**
4 months

- Website Development Research/Project Leader**
March 2019 – Present • 4 months
- Currently leading website design, development, and research projects with my colleague Aditya Bhujle. We are trying to develop applications that are not only functional and efficient, but are also scalable. Our core belief is that the innovation of tomorrow starts with today's research, development, and hard work.

June 2017 – Present • 2 years 1 month
- Creator and Founder of BluCube Pay**
March 2018 – Present • 1 year 4 months
- Web Engineer**
June 2017 – Present • 2 years 1 month
- Building out and managing BluCube Media Blog, a news aggregator web application, as well as a blog for web development and design.
- *Building front end components in HTML, CSS, JavaScript, and JQuery.
- *Building back-end for multiple REST API components in PHP, MySQL and NodeJS.
- *Building a custom search engine to search Blog Articles and Posts.
- *Created an autoposting system using PHP and CRON requests.
- Editorial Manager**
May 2017 – Present • 2 years 1 month
- I manage and run BluCube Media's blog page, as well as its news feed. I created the news and blogging system that has allowed BluCube Media to boast of a news aggregator.
- *BluCube Media is the only news aggregator in Cary, NC
- *BluCube Media takes pride in displaying top trending news headlines and articles
- *BluCube Media takes pride in displaying non biased aggregated news reports
- *BluCube Media takes pride in displaying hourly news to its readers
- *BluCube Media takes pride in providing a concise location for avid news readers to view the news in one location
- *As Editorial Manger, I have grown BluCube Media's subscriber count from no subscribers, to over 100 active article/blog subscribers

**Creator of RedTree Web Browser**
RedTree Web Browser
May 2018 – Present • 1 year 2 months

A fast, secure, and open source web browser. Designed for simplicity of use and ease of access. Download it here:
<https://github.com/MichaelSu777/RedTree/releases/download/03/RedTree.exe>

**Intern**
College Swimming Guide
July 2018 – August 2018 • 2 months

**Extern**
Cisco
June 2018 – July 2018 • 2 months

A month-long Externship program held at Cisco's RTP campus. Learned about Cisco technology and job shadowed Cisco employees, while also learning about Cisco's technical aspects in the real world such as the growth and acquisition of startups, development of new products, and new technological innovation. Using the concepts that I learned throughout the program, I was able to work with a team to innovate and develop a solution to public transportation in Durham through the use of IoT and Cisco technology.

Honors & Awards

2018 Cisco High STEM Externship Capstone Project Winner
July 2018

Created and innovated a transportation solution for the city of Durham using IoT and Cisco technology as a part of a year-long Capstone Project for the Cisco High STEM Externship. Worked with a team to flesh out our solution, implemented Cisco and IoT technology, created a real-time traffic dashboard using AI and data analytics, created an app for our solution, and pitched our idea to revolutionize transportation and fix transportation issues in the city of Durham.

**Cisco High School STEM Program 2018 Innovation Challenge Runner-Up**
Cisco
June 2018

Designed and innovated a possible solution and innovative approach for the retail industry to make dressing rooms and store management more efficient. Pitched our solution to judges shark tank style, and finished in 2nd place.

North Carolina TSA June Member Of The Month
Technology Student Association
June 2018

North Carolina Technology Student Association Member Of The Month for June.

"NCTSA is proud to announce that Michael Su is our June Member of Month! Michael is an active TSA member at Panther Creek High School, where he serves as a chapter officer and also has showcased his leadership in competitive events at both the State and National Conference. Throughout his TSA career, he's won numerous awards at the state level, even placing in the top 3 for Animatronics, 3D Animation, and Webmaster at the 2018 NCTSA State Conference. His level of dedication to TSA is so inspiring! Keep up the amazing work Michael! #memberofthemonth #technologystudentassociation #wearit #leadingourfuture"

1st Place in State Level Webmasters Competition
Technology Student Association
April 2018

I built and designed a website that ended up winning first place in North Carolina Technology Student Association's State Webmasters Competition.

2nd Place in State Level 3D Animation Competition
Technology Student Association
April 2018

2nd Place in State Level Animatronics Competition
Technology Student Association
April 2018

National Technology Student Association Conference Qualifier
Technology Student Association
June 2017

Second Place at State Level TSA Competition in Robotics
Technology Student Association
April 2017

Excellence Award at VEX Robotics Apex Middle School Competition
VEX Robotics
February 2017

1st Place at VEX Robotics Panther Creek Regional Competition
VEX Robotics
January 2017

Projects

Eagle Search
May 2018 – Present

BluCube Media's own search engine and creation. A new and better way to search the web. Eagle Search provides users with a fast, secure, customizable, and private search engine, with HTTPS encryption so that your data is kept confidential. Created by the BluCube Media team. I built and manage the backend/search functionality of Eagle Search.

Q&A Application
May 2018 – Present

A question and answer app built with Python. Anyone can post questions, which can then be answered by people who are knowledgeable on the subject.

RedTree Web Browser
May 2018 – Present

A fast, secure, and open source web browser. Designed for simplicity of use and ease of access. Download it here: <https://github.com/MichaelSu777/RedTree/releases/download/03/RedTree.exe>

Web-Net
May 2018 – Present

Created and manage a social networking application with features such as login, sign up, CRUD functionality, posting, direct messaging, quick login, tags, location services, custom audio and video player, and so much more! This project is continuously maintained by me, and is updated routinely to add new, cool features and functionality.

BluCube Pay
March 2018 – Present

Created and founded BluCube Pay, an online eCommerce and money transfer system dedicated to providing fast, affordable, and secure transactions for all websites. Completely secure, with SSL encryption and DDOS protection.

Live Pusher Poll
March 2018 – Present

Created a live polling application with the MEAN stack. The application provides users with a live polling system that updates in real time. In addition to its real time updates, the application is also scalable for any size project or web application.

BluCube Music
February 2018 – Present

Created a free, online music uploading application that saves your music in a playlist, allowing users to save their downloaded music to play. Built with full customization features, allowing users to also customize playback speed, duration, and music cover images.

Site-TemplateJS
August 2017 – Present

An easy website building framework made in JavaScript that lays out the design of the site, all without any CSS or styling. 100% responsive, and dynamic. Made for quickly laying out the site so that users can quickly customize the site to their liking. All you have to do is add the CDN: `<script src="https://site-templatejs.github.io/site-templatejs.min.js"></script>`, and then add the correct classes for each element.

View an example of its usage at: <https://site-templatejs.github.io/>

Eagle Search App

Recommendations

A preview of what LinkedIn members have to say about Michael:

" Michael worked as an intern the summer between his junior and senior year in high school. The project consisted of creating social media posts using quotes from relevant blogs and industry related images. It required using technical tools which were new to Michael but he taught himself quickly and mastered them. Michael showed initiative when suggesting alternatives for images that he thought would be more relevant. He also demonstrated creativity in his end product. He didn't hesitate to ask questions in order to better understand the project. Michael is reliable and hard-working and would be an asset to any organization.
